

ATTACHMENT C - Chesterfield, Virginia

1. Available records indicate that Newco Chemical Waste Systems, Inc. subcontracted Lorber Trucking to remove seventy-one (71) 55-gallon drums of materials from the Allied Chemical facility in Petersburg, Virginia. The records indicate that such removal occurred on February 5, 1979.

Based upon information and belief, 54 of the drums are believed to have been delivered to the Scientific Chemical Processing ("SCP") facility in Newark, New Jersey, with the other 17 drums of the shipment remaining on the truck and being taken to Newco's facility in Niagara Falls, New York. A NJDEP manifest (Attachment C - Document No. 1) provided to Allied officials by USEPA indicates that 54 drums from Allied Chemical's Chesterfield, PA (sic) were delivered to SCP-Newark, New Jersey on February 6, 1979. The Lorber bill of lading (Attachment C - Document No. 2) in Allied's possession indicates the sequence of loading of drums for the shipment. This document indicates that drums with Waste Codes K, F and A were loaded first and drums loaded pursuant to these codes include 17 drums based upon Allied's bill of lading (Attachment C - Document No. 3). The Lorber bill of lading indicates that drums under Waste Codes L, C, E, J, D, G, and H were loaded last. Waste codes L, C, E, J, D, G and H as shown on Allied's bill of lading included 54 drums.
